More reasons to celebrate!

Michele Del Zotto, a researcher at the Department of Mathematics and the Department of Physics and Astronomy, has received an ERC Consolidator Grant from the European Research Council (ERC). He is going to explore the theory of quantum fields – by studying the higher structure of their symmetries.

Joseph Minahan, Professor of Theoretical Physics, has been awarded an ERC Advanced Grant to study the strong forces holding the building blocks of protons together. His project is called Integrable Gauge Theories at Finite Temperature (IGTaFT).
