- How the work has promoted the department
- Collaborations within and outside the department
- Impact different target groups
- Potential for new and further collaboration

Motivation CoAct Prize 2025

The CoAct Prize is awarded to a researcher who has shared a passion for science to a young and diverse audience through versatile and extensive contributions to outreach.

Through open and inclusive science communication, the recipient has inspired broader understanding of the universe through public talks, science festivals, school visits, and media appearances.
